- Technical data

The **JUVORA™** Dental Disc is a shock-absorbent¹, permanent solution for implant borne, fixed and removable prosthetic frameworks made with precision through CAD/CAM workflows.

- Made from **PEEK-OPTIMA™**
- Reduced stress shielding¹
- Extremely strong, durable¹
- High resistance to wear, abrasion and corrosion¹
- Proven long-term biocompatibility as an implantable material¹

Indicated for many different dental frameworks:

- All-on-4 & All-on-6 hybrid implant frames
- RPD partial frames
- Full contour 3 unit bridges
- Full contour crowns
- Internal denture strengtheners
- Implant bars

JUVORA™ Dental Disc implant prosthetic potential benefits include¹

- Up to **10%** better implant survival rate
- Up to **x3** less bone loss
- Up to **10%** less incidence peri-implantitis
- Up to **8%** better prosthetic survival rate

Available in
Natural and
Oyster White
colour

Everyday millions of people rely on products that use PEEK solutions, from smart phones, to planes and cars to medical devices

20+ YEARS
