SECTION 4: FIRST AID MEASURES

4.1

4.2

Description of first aid measures	
Inhalation	Remove patient from exposure. Keep patient at rest and give oxygen if breathing difficult. If symptoms develop, obtain medical attention.
Skin Contact	After contact with skin, wash immediately with plenty of soap and water. In the event of contact with molten product: Cool affected area quickly with water. Do not attempt to remove hardened product. Obtain medical attention.
Eye Contact	Flush eyes with water for at least 2 minutes while holding eyelids open.
Ingestion	No treatment necessary.
Most important symptoms and effects, both acute and delayed	Unlikely to be required but if necessary treat symptomatically.

4.3 Indication of any immediate medical attention and special treatment needed Unlikely to be required but if necessary treat symptomatically.

SECTION 5: FIRE-FIGHTING MEASURES

5.1	Extinguishing media Suitable Extinguishing Media	In case of fire, use water spray, foam, dry powder or \mbox{CO}_2 for extinction.
	Unsuitable Extinguishing Media	None.
5.2	Special hazards arising from the substance or mixture	In case of fire the following can develop: Oxides of carbon.
5.3	Advice for fire-fighters	A self-contained breathing apparatus and suitable protective clothing should be worn in fire conditions. Dust is ignitable but will not sustain combustion. A high temperature source of ignition is required. Insensitive to sparks. The minimum spark energy required for ignition of a dust cloud is greater than 5000 mJ. It will not train fire, e.g. along beams etc.
5.4	Other	Dispose of contaminated extinction water according to official regulations.

SECTION 6: ACCIDENTAL RELEASE MEASURES

 6.1 6.2 6.3 6.4 6.5 SECTION 	Personal precautions, protective equipment and emergency procedures Environmental precautions Methods and material for containment and cleaning up Reference to other sections Additional Information	Avoid inhalation and contact with eyes or skin. Ensure sufficient supply of air. Avoid build up of dust. Remove possible cause of ignition – do not smoke. Take precautionary measures against static discharge. Avoid release to the environment. Prevent surface and ground water infiltration, as well as ground penetration. Sweep up carefully with non-sparking tools. Transfer to a lidded container for disposal or recovery. Refer to Section 13 for disposal considerations and Section 8 for Personal Protection. None.
7.1		General hygiene measures for the handling of chemicals are applicable. Eating, drinking, smoking, as well as food storage, is prohibited in work room. Avoid build up of dust. Local Exhaust Ventilation at the workplace or on the processing machines required. Note: Danger of explosive dust. Machine Cleaning (purging): Purging with other polymers (e.g Polyethylene) at high temperatures can be hazardous. Auto ignition may also occur. Local exhaust ventilation is required. The relevant Safety Data Sheet for the purge material to be used should be consulted. Additional information can be obtained from the Invibio Processing Guide.
